Summary

- Full Stack Engineer specializing in frontend architecture, reusable UI systems, and maintainability.
- Strong expertise in Angular and React
- with solid backend experience in the Node.js ecosystem and deployment on AWS
- Experienced in leading technical design and working closely with Designers, Product Managers, Backend Engineers, and QA.

Professional Experience

Frontend Developer - ViewSonic

Jul 2022 - Jan 2026

- Designed and implemented a shared Angular UI Library based on Angular Material CDK and Tailwind CSS, delivering **20+ components** and shared directives across an Angular monorepo, adopted by **4 production projects**.
- Established UI design principles including headless UI architecture, directive-based logic abstraction, semantic HTML, RWD support, and WCAG accessibility.
- Led a large-scale refactor of the **ViewSonic Manager** project by rewriting duplicated logic and over-abstracted state management, and extracting business logic from components into reusable, testable functions.
- Implemented **WCAG accessibility** compliance for myViewBoard.com to align with the EU Accessibility Act.

Frontend Developer - Cloud Interactive

Apr 2021 - May 2022

- Built the **TSMC Online** project from scratch using React (v17), styled-components, and Material UI for a large enterprise client.
- Maintained a custom Webpack configuration to support flexible build strategies, including packaging sub-pages as standalone websites.
- Implemented dynamic API-driven forms and reporting interfaces with full responsive design.
- Introduced automated testing using Jest and React Testing Library, with scenarios written in BDD (Cucumber-style).

Full Stack Developer - Actura

Oct 2018 - Mar 2021

- Developed an **e-learning platform** for teacher course preparation, covering both frontend and backend responsibilities.
- Built Angular web applications with responsive design, multi-language support, and social login integration.
- Designed and implemented Node.js RESTful APIs with JWT authentication and role-based access control.
- Deployed frontend and backend systems to **AWS** cloud environments.

Full Stack Developer - Siiva

Dec 2017 - Aug 2018

- Implemented a Node.js based **bullet time** video generation system using synchronized images captured from multiple action cameras.
- Built and maintained RESTful APIs and deployed systems to cloud platforms.
- Gained early experience in backend system design and distributed photo processing workflows.

Projects

ViewSonic Manager

[Link](#)

- Large-scale device management web application supporting complex device states and cross-team feature development.
- Refactored frontend architecture by extracting business logic from UI components into reusable, testable functions to reduce duplicated logic and improve maintainability.
- Collaborated closely with designers, backend engineers, and QA during a major UI redesign, ensuring consistent behavior and safer iteration.
- Applied accessibility (WCAG) considerations and responsive design across critical user flows.

TSMC online

[Link](#)

- Built a large-scale enterprise online platform from scratch using React v17, styled-components, and Material UI.
- Designed the frontend architecture to support dynamic API-driven forms and reporting interfaces.
- Maintained a custom Webpack configuration to enable flexible build strategies, including packaging selected pages as standalone deployments.
- Introduced automated testing with Jest and React Testing Library (BDD-style) to improve reliability of complex user interactions.

FlipRobot

[Link](#)

- Built a product-oriented e-learning platform for STEAM robotics education, serving teachers with online courses and teaching resources.
- Developed the frontend using Angular with responsive web design for cross-device usage.
- Implemented backend services with Node.js, including role-based access control (RBAC).
- Deployed and maintained the full-stack application on cloud infrastructure.

Technical Skills

- **Frontend:** Angular, React, JavaScript, TypeScript, Tailwind CSS, Angular Material, Material UI
- **Backend:** Node.js, RESTful APIs, JWT, RBAC
- **Testing:** Jest, React Testing Library, BDD
- **Cloud / Infra:** AWS
- **Other:** Monorepo architecture, Accessibility (WCAG), Responsive Web Design, Webpack

Education

National Taiwan University

Sep 2014 - Aug 2016

- Master's Degree in Engineering Science and Ocean Engineering
- GPA: 3.94/4.30

National Taiwan University

Sep 2010 - Jun 2014

- Bachelor's Degree in Engineering Science and Ocean Engineering
- GPA: 3.59/4.30
